Telefonist

Eesti keeles

Telefon on mul olemas ja kui see on sisselülitatud ja töökorras, siis saab mind kätte selliselt numbrilt:
(+372) 5593 5882

No ilmselt, et kui ma olen tööl parajasti [1)], siis ma seda telefoni muidugi vastu võtta ei saa, aga vähemalt märge jääb maha, et keegi helistas.
Ei garanteeri, et ise tagasi helistan, kuna see on ju tasuline…

Ja alati on ju võimalik edastada ka see SMS sellele telefoni numbrile, siis vähemalt tean milles see küsimus või probleem seisneb. Vähemalt tean siis “tuvastada”, et kes mis numbri alt minuga ühendust võtta soovib.

In English

I have a phone and if it is turned on and working, you can reach me at this number: (+372) 5593 5882

Well, obviously, if I'm at work[2], I won't be able to answer the phone, but at least I'll leave a note that someone called.
I can't guarantee that I'll call back, because it's a paid call...

And it's always possible to forward this SMS to that phone number, so at least I know what the question or problem is. At least then I can “identify” who wants to contact me from which number.

1)
sel momendil kui te just helistate
2)
at the moment you're calling
