Planes

Planes are realms of existence that overlap our own, but can’t be seen. These worlds have been referred to as many things: in Buddhism, they are higher planes of existence that can only be reached through meditation and prayer.

For others, they are where we dream, where our fate “lives”, where the secrets of the Universe flow like a river – so close, yet so far away. Many over the millennia of human history have sought to try and enter these realms, whether psychically, physically or spiritually, but few are capable.

This is especially true of the plane that keeps our world reality alive, which you can liken to a compendium or collection of all the universe’s knowledge. It knows the past, the present, the future and every secret and truth there within.

For those that are lucky enough to see it, the information can be overwhelming – like seeing everything all at once. The threads of fate, the truth of your astrological birth, your destiny itself lies within as clear as day, etched into the ether.
